TECHNOLOGIES

XTREM TOUCH CONSTRUCTION

An evolution of the Classic 3K carbon that combines the strength of the carbon fibre and the elasticity of the aluminium and polyester fibres. Its particular weaving structure allows it to disperse vibrations evenly in all directions.

Dynacore HD

Unmatched combination of flexibility and torsion stability. Constant feel and long lasting performance for aggressive players.

EZ LOCK+ EYELETS

A new, updated grommet shape, acting as a string guide for easier restringing and easier tying of knots.

BUMPER ARMOR CAP

Thicker, wider and longer bumper guard. Better protection with more durable bumper guard.

T. FIGHT XTC

THE MOST POWERFUL OF CONTROL-ORIENTED RACKETS

T.FIGHT XTC LIGHT

PLAYERS' NEEDS:

Ball speed / Ball Depth / Lightness and easy to use

TECHNOLOGIES

An innovative frame shape which generates more power, which allows the player to hit deeper and faster shots, with improved stability.

In order to link the string and frame, an exclusive multi material combination is used, situated under the grommets. This optimises comfort and to bring out a better feeling and a better sound.

EZ LOCK EYELET

A larger and flatter eyelet, which eases finishing off the stringing job.

BUMPER ARMOR CAP+

A thicker, wider and longer bumper. Better protection with a tougher bumper.

T-FIT

A RANGE OF RACKETS, BEST ADAPTED FOR THOSE WHO PLAY REGULARLY SOCIALLY
